### **DETAILED ACTION**

Claims 1-23 pending and subject to restriction requirement.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a tissue section-containing carrier for culture of animal cells.

Group II, claim(s) 14-21, drawn to a method of culturing a cell culture.

Group III, claim(s) 22 and 23, drawn to a method for transplanting cultured animal cells.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features that defines a contribution over the prior art for the following reasons: "a tissue section-containing carrier for culture of animal cells" is known in the prior art. For example: the reference by Mori et al. {IDS reference} teaches "a tissue section-containing carrier for culture of animal cells" that is liver tissue culture mounted on cover glass and cultured (page 320, section Materials and Methods).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1651

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
